PA-SERIES
POWER AMPLIFIER

LB LOUDSPEAKERS AUDIO COMPONENTS MADE IN MUNICH

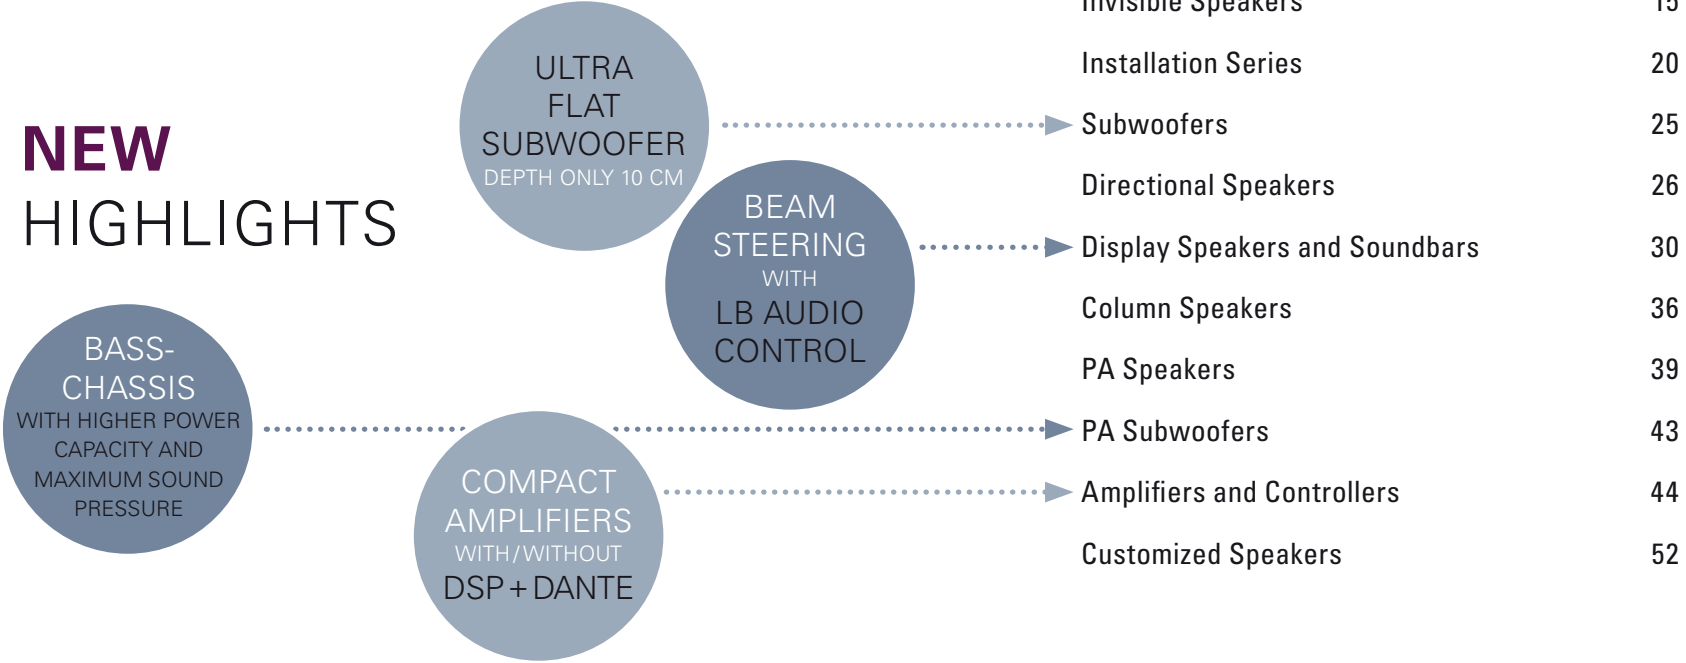

Our passion for music and acoustics has shaped the way we work for more than 30 years. We are guided by our commitment to **pure listening** – the experience of room dimensions accentuated by acoustic excellence.

At our site in Munich, we develop and manufacture speakers along with perfectly attuned amplifier technology. Our mission is to create minimalist, customized designs equipped with state-of-the-art technology – delivering perfect acoustics in harmony with every room's architecture. Looking to the future, we are focused on sophisticated audio concepts for maximum user flexibility.

Every project presents its own unique set of challenges – and its own unique answers from your LB team.

PRODUCTS 2024

NEW HIGHLIGHTS

IN-WALL / IN-CEILING SPEAKERS

NEXT GENERATION Our **DE series** sets new standards in high-end, in-wall/in-ceiling sound systems and feature an elegant and slim installation frame. Compact dimensions and perfect acoustics are just some of the highlights of this new series. The installation height of the sophisticated steel installation frame of our round, square, and rectangular models is just 1.2 mm while the ultra-compact design means that only a minimum amount of installation space is required in ceilings and walls. Thanks to the modular concept comprising an installation frame, speaker unit, and magnetic front grille, the speakers can be installed flexibly and securely in any type of ceiling or wall.

Depending on requirements and room/situation, the various models in the DE series can be combined to create impressive and visually harmonious sound systems.

The models with optimized Polar® technology are designed for exceptionally consistent sound transmission from the in-ceiling sound system, even with just a few speakers. They offer a dispersion angle of 180°.

The models in the CD and FR series feature targeted dispersion and are especially suitable as front speakers in AV systems and conference spaces.

- **Elegant steel frames**
- **Installation height of just 1.2 mm**
- **Flexible assembly with clamps**
- **A variety of dispersion characteristics**
- **Optimized Polar® technology**

ULTRA-COMPACT STRUCTURE

DE 300 FR In-Ceiling Front Speakers with Beam Direction -35° downwards

Clientis Bank Oberuzwil CH
In-ceiling sound system with DE Series speakers

To ensure natural reproduction and perfect acoustic dispersion, we have further optimized our new generation of patented coaxial drivers that feature **Polar® technology**.

SLIM DESIGN

With a few Polar speakers it is possible to homogeneously fill a room with sound.

Small In-Wall / In-Ceiling Speakers

DE 100	High-quality miniature full-range speaker with electronic equalization. Power capacity RMS/program 20/40 watts, impedance 8 ohms Overall diameter 102 mm, cutout diameter 96 mm, mounting depth 55 mm
DE 100 T	100 V version, power 2.5/5/10 watts
DE 100 Q	Square, otherwise like DE 100 Dimensions 102 × 102 mm, cutout size 96 × 96 mm, mounting depth 55 mm
DE 100 QT	Square, 100 V version, power 2.5/5/10 watts

TRIMLESS IN-WALL/ IN-CEILING SPEAKERS

Our trimless speakers of the **DE-X series** are high-end speakers for flush mounting in ceilings and walls.

The minimalist appearance and compact dimensions of the round, square, and rectangular models of the DE-X series allow sound concepts of outstanding audio quality to be implemented with minimum intrusion in indoor spaces that feature a sophisticated interior design.

Depending on requirements and on room/situation, the various speaker models in the DE X series can be combined to create impressive and visually harmonious sound systems.

The models with optimized Polar® technology are designed for exceptionally consistent sound transmission from the in-ceiling sound system, even with just a few speakers. They offer a dispersion angle of 180°.

The models in the CD and FR series feature targeted dispersion and are especially suitable as front speakers in AV systems and conference spaces.

- **Trimless with flush mounting**
- **Minimal dimensions**
- **Ultra-compact structure**
- **Maximum flexibility during installation**
- **A variety of dispersion characteristics**
- **Optimized Polar® technology**

The speakers of the DE-X Series are flush mounted in walls and ceilings. After installation only the flush-mounted front grilles are visible.

INVISIBLE SPEAKERS

PUSHING THE LIMITS Our **DE Plan series** consolidates all of our experience since 1999 in developing invisible speakers, redefining what is technically possible with speakers of this kind. The combination of flat-membrane woofer drivers, high-frequency exciters, and the latest generation of **de:shape®** membranes means maximum linearity and sound pressure in the low frequency range. As the entire membrane surface is used for homogenous sound dispersion, the dimensions of our DE Plan series are remarkably compact. The mathematically calculated contour of the de:shape® membranes and the patented absorption elements prevents interference caused by membrane resonance for unprecedented precision in sound reproduction. Thanks to the optimized coupling between the drivers and dispersion membrane, the new models respond a lot less sensitively to deviations in covering material (plastering, lining, and paint). After installation, the speakers are completely concealed in ceilings and walls.

DEplan®

- Invisible
- Compact dimensions
- Flexible installation in all ceilings and walls
- Excellent low-frequency characteristics

INVISIBLE LINE ARRAY WITH ADJUSTABLE DISPERSION DIRECTION

The **DE Plan 800 AIArray** is an invisible 4-channel line array with an adjustable dispersion direction. It can be installed in walls or ceilings and enables sound dispersion to be adjusted to the listening zone. The system is controlled using our PA-series multichannel DSP power amplifiers and the dispersion direction is programmed using our **LB AUDIO CONTROL Software**.

DE Plan transducers have a dispersion angle of 180°. This broad omnidirectional behavior enables rooms to be evenly filled with sound using just a few systems. The speakers can be installed in ceilings as well as in walls.

de:shape®

DEplan®

DE Plan 200 2-way planar transducer with wide dispersion angle (180°)
Power capacity RMS/program 60 / 120 watts, Impedance 8 ohms
Dimensions 300 × 240 mm, cutout size 302 × 242 mm, mounting depth 72 mm
Incl. installation frame and kit

Model

DE Plan 500 S 2-way planar transducer with small construction and wide dispersion angle (180°)
Power capacity RMS/program 80 / 160 watts, impedance 8 ohms
Dimensions 540 × 140 mm, cutout size 542 × 142 mm, mounting depth 72 mm
Incl. installation frame and kit

DE Plan 500 S

0405-0001

DE Plan installation – we will be happy to assist you! You can find the detailed installation instructions on www.lb-lautsprecher.de

Mark, cut out, bevel edges, smooth.

Insert frame and secure feet.

Remove frame.

Insert loudspeaker system, secure...

... and test functioning.

Adjust fastening screws, spatula smooth and polish.

Stretch out glass fiber fabric, smooth down and leave to dry.

Smooth finely with spatula two to three times and polish transitions.

Alternatively, the entire surface including the speakers can be concealed using painter's lining.

Finally paint over.

Only in combination with system power amplifiers of the PA DSC Series

DE Plan 800 AIArray, in-ceiling installation with adjustable directivity

DE Plan 800 AIArray, in-wall installation with adjustable directivity

In the case of the **DE Plan 800 AIArray**, the dispersion direction is set by programming the corresponding DSP power amplifiers using our browser-based **LB AUDIO CONTROL Software**. The required angle is set by selecting the appropriate preset from the preset library in 1° up to 3° increments. In addition to selection of the dispersion direction, the software also provides the usual setting options such as parametric EQs, delays, compressors, and limiters. Project-specific presets available on request.

DE Plan inside for Furniture Build-In

The special built-in versions of the **DE Plan inside® series** can be installed in furniture and wall panels. The speakers are back-mounted onto the front of furniture or panels made of wood, MDF or similar materials and directly resonate through these surfaces. As the radiating surface is driven without an intermediary membrane, DE Plan inside speakers achieve high efficiency and a wide linear frequency range. These speakers should be adapted to different built-in materials and room acoustics using our **DSP amplifiers**.

INSTALLATION SERIES

Our **installation series** includes universal speaker models that can be installed in a variety of ways, for example wall-mounted, pendant, satellite, and monitor speakers as well as subwoofers. All models offer unbeatable sound quality and power for the respective design. Thanks to clear lines and a superior surface finish, these speakers blend seamlessly into indoor spaces with a sophisticated interior design. They can be used in premium home audio systems as well as in installations for media spaces, presentation areas, and hospitality venues. Thanks to their balanced sound, they can be perfectly combined with the corresponding models from our built-in speaker series.

- **Clear shapes**
- **High-quality surfaces**
- **Very linear reproduction**
- **Wide frequency range**

Customized Subwoofers

We offer numerous customized subwoofers with individual cabinet dimensions. This allows an almost invisible integration of the subwoofers into ceilings, walls, wall paneling or built-in furniture. We will be happy to assist you!

Subwoofers

Our **high-power subwoofers** use dual-vented bandpass cabinets that ensure maximum sound pressure levels with compact dimensions. Due to the minimized surface area of the sound outlets, the subwoofers can be discreetly integrated in indoor spaces or furniture. The **active models** feature class D amplifier modules equipped with limiters, VCAs, and an automatic switch-on function.

Subwoofers		Model	Order no.

ib DIRECTIONAL SPEAKERS

The **RL series** includes directional speakers with a cardioid or supercardioid pattern for targeted sound transmission and high speech intelligibility. They can be used in exhibition centers with limited listening zones as well as for voice amplification in conference spaces, auditoriums, and large public spaces such as foyers, halls, and train and bus stations.

► rlseries

The **RL 110 Series** was specially designed for targeted sound transmission at exhibitions and museums

ZKM Karlsruhe active directional speakers with integrated motion sensors (RL 110 AX)

RL 204 SN
2-way directional speaker with supercardioid pattern for targeted sound transmission in rooms with long reverberation time

Kunstabau Munich mobile multi channel PA system with RL 206 SN directional speakers

The pendant speakers **RL 180 NT** and **RL 180 NT EVAC** with cardioid pattern are dedicated to over large public spaces. The backward sound emission to the ceiling is minimized.

The models **RL 110**, **RL 204 SN** and **RL 206 SN** with supercardioid pattern and narrow beam width are used to cover defined listening areas.

In the **RL 110 series**, the lateral arrangement of the sound outlets in the cabinet causes a supercardioid pattern to be generated. This design principle provides a high level of sound focus with minimum lateral and rear dispersion across the entire frequency range.

Directional Speakers with Narrow Dispersion Angle (80°)		Model	Order no.
RL 110	Full-range directional speaker with narrow dispersion angle (80°) Power capacity RMS/program 20 / 40 watts, 8 ohms Diameter 110 mm, length 190 mm	RL 110 White	0901-0001
		RL 110 Black	0901-0002
RL 110 T	100 V version, power 2.5/5/10 watts	RL 110 T White	0901-0003
		RL 110 T Black	0901-0004
RL 110 A	Active full-range directional speaker with narrow dispersion angle (80°) Power 20 watts, incl. power supply, diameter 110 mm, length 190 mm	RL 110 A White	0901-0005
		RL 110 A Black	0901-0006
RL 110 A-MP3	Active full-range directional speaker with integrated MP3 player and narrow dispersion angle (80°), power 20 watts, incl. power supply Diameter 110 mm, length 190 mm	RL 110 A-MP3 White	0901-0007
		RL 110 A-MP3 Black	0901-0008
RL 110 AX	Active full-range directional speaker with integrated motion sensor and narrow dispersion angle (80°), power 20 watts, incl. power supply Diameter 110 mm, length 190 mm	RL 110 AX White	0901-0009
		RL 110 AX Black	0901-0010
RL 110 AX-MP3	Active full-range directional speaker with integrated motion sensor, MP3 player and narrow dispersion angle (80°) Power 20 watts, incl. power supply, diameter 110 mm, length 190 mm	RL 110 AX-MP3 White	0901-0011
		RL 110 AX-MP3 Black	0901-0012

The patented active directional loudspeaker **RL 110 PerZonic®** automatically adapts the output volume to the ambient noise of the listening zone. The control settings can be adjusted to the respective sound environment.

RL 110 PerZonic	PerZonic active directional speaker with volume control and narrow dispersion angle (80°) Power 20 watts, incl. power supply, diameter 110 mm, length 190 mm	RL 110 PerZonic White	0901-0013
		RL 110 PerZonic Black	0901-0014
WH 110	Rotatable/pivotable L-bracket with assembly plate Suitable for RL 110 / FZ 110, incl. safety rope	WH 110 White	7109-0001
		WH 110 Black	7109-0002
SR 300	Stainless steel rope for pendant mounting, length 3 m, thickness 1 mm, one side with loop	SR 300	7109-0003

Thanks to its cardioid pattern, the **RL 180 N Polar®** is especially suitable for consistent sound transmission from the in-ceiling sound system in indoor spaces with long reverberation times.

Directional Polar Speakers with Cardioid Pattern (160°)

RL 180 N Polar 2-way speaker with Polar technology and cardioid pattern, high efficiency and wide dispersion angle (160°), power capacity RMS/program 60 / 120 watts 8 ohms, diameter 180 mm, length 280 mm

RL 180 NT Polar 100 V version, power 7.5/15/30 watts

WH 180 Rotatable /pivotable L-bracket with assembly plate Suitable for RL 180 / FZ 180, incl. safety rope

SR 300-16 Stainless steel rope for pendant mounting Length 3 m, thickness 1.6 mm, one side with loop

WH 180 Black 7109-0007

SR 300-16 7109-0008

The **RL 180 NT EVAC** is a 2-way speaker that is certified in accordance with **EN 54-24** and designed to be suspended from ceilings in indoor spaces with long reverberation times. The proven Polar® technology achieves a constantly wide dispersion angle at medium and high frequencies. The cardioid pattern at low frequencies minimizes sound dispersion towards the back, effectively suppressing interference caused by sound reflections from the ceiling. As such, just a few RL 180 NT EVAC speakers can be used to achieve exceptionally consistent sound transmission with high speech intelligibility, even in acoustically challenging spaces.

Directional Polar Speakers with Cardioid Pattern (160°) for Voice Alarm Systems

RL 180 NT EVAC 2-way speaker with Polar technology and cardioid pattern, high efficiency and wide dispersion angle (160°) power capacity RMS/program 60 / 120 watts, 8 ohms Diameter 180 mm, length 280 mm

WH 180 Black 7109-0007

SR 300-16 7109-0008

The **RL 204 SN** and **RL 206 SN** models are PA speakers with a supercardioid pattern. The cabinet design with lateral sound outlets that emit inversely phased sound creates a high level of directivity across the entire frequency range. These speakers can also be used in spaces with long reverberation times to create sound systems with high speech intelligibility and clear reproduction of music. For full-range applications, we recommend combining with our subwoofers.

Directional Speakers with Super Cardioid Pattern (H×V) 80°×40°		Model	Order no.

DISPLAY SPEAKERS AND SOUNDBARS

Our **display speakers** and **soundbars** are designed for video conferences and high-quality sound reproduction in media spaces. The active stereo systems are equipped with a digital signal processor (DSP) and multiband limiters. They offer a broad frequency range and facilitate high speech intelligibility. The DL-A 2.2 and SB-A 2.2 models are active 2-way systems with integrated subwoofers and higher output power. They are especially suited to larger indoor spaces and superior music reproduction. Our new models **DLA 2.4 DSC** and **DLX-A 2.8 DSC** with beam steering have been developed specifically with large displays and LED walls in mind.

The **SB-A 2.0 CAM Series** comprises active stereo soundbars with integrated camera that offer outstanding picture and sound quality in small conference rooms and huddle rooms.

Clifford Chance Munich
Display speakers for conference rooms

The vertical beam direction of the DSP-controlled line arrays is set by entering the angle in our LB AUDIO CONTROL Software.

Customized soundbars 960 to 2350 mm wide and display speakers 700 to 4000 mm high for high quality sound reproduction at displays, split walls and LED walls.

NEW ACTIVE DISPLAY SPEAKERS WITH BEAM STEERING

The new active display speakers DL-A 2.4 DSC AIArray and DLX-A 2.8 DSC AIArray are designed for combinations with large displays, split walls, and LED walls. Both models feature an adjustable vertical beam direction and can be optimally directed towards listeners.

Active Display Speakers with Beam Steering for large screens

The new **active display speakers** DL-A 2.4 DSC AIArray and DLX-A 2.8 DSC AIArray are designed for combinations with large displays, split walls, and LED walls. Both models feature an adjustable vertical dispersion direction and can be optimally directed towards listeners regardless of installation height.

The dispersion direction is set by selecting the corresponding preset in our **LB AUDIO CONTROL Software** in 1° up to 3° increments. The 3-way systems offer two power levels (2 x 500 watts and 2 x 1000 watts) and include integrated subwoofers. They are ideal for high-quality reproduction of speech and music, even in larger indoor spaces. We also manufacture custom versions of both models tailored to the relevant display height.

LB COLUMN SPEAKERS

The line arrays of the **ZL series** are powerful speaker systems for targeted sound dispersion with a high level of directivity. As well as models with a variety of fixed dispersion characteristics, we also provide multichannel line arrays with adjustable dispersion characteristics. All models feature an elegant cabinet that is just 8 cm wide and are fitted with high-efficiency audiophile full-range speakers, ensuring high speech intelligibility as well as outstanding music reproduction. Due to the large number of sound sources, the ZL series has an extremely low feedback tendency when using a microphone.

- Low feedback tendency
- Audiophile full-range speaker
- Very good low frequency sound
- Speech and music
- Elegant slim design
- A variety of fixed and adjustable dispersion characteristics

Passive multichannel **line arrays** for operation with the multichannel DSP power amplifiers of the PA series. The vertical directivity can be adjusted using our newly developed, browser-based **LB AUDIO CONTROL Software**. The line arrays can be combined to create longer arrays.

Passive Multi-Channel Column Speakers		Model	Order no.
ZL 125 AIArray	Passive 4-channel high-power line array with AIArray technology for 4-channel active operation, adjustable vertical directivity Power capacity RMS/program 4 × 60 / 120 watts, 8 ohms Dimensions (W × H × D) 80 × 1250 × 110 mm, brackets not included	ZL 125 AIArray White	1006-0001
		ZL 125 AIArray Black	1006-0002
ZL 200 AIArray	Passive 6-channel high-power line array with AIArray technology for 6-channel active operation, adjustable vertical directivity Power capacity RMS/program 6 × 60 / 120 watts, 8 ohms Dimensions (W × H × D) 80 × 1920 × 110 mm, brackets not included	ZL 200 AIArray White	1007-0001
		ZL 200 AIArray Black	1007-0002
ZL 250 AIArray	Passive 8-channel high-power line array with AIArray technology for 8-channel active operation, adjustable vertical directivity Power capacity RMS/program 8 × 60 / 120 watts, 8 ohms Dimensions (W × H × D) 80 × 2500 × 110 mm, brackets not included	ZL 250 AIArray White	1008-0001
		ZL 250 AIArray Black	1008-0002

Active, DSP-controlled line arrays with adjustable vertical directivity and a long throw ensure consistent sound transmission across large spaces. They offer an exceptionally wide frequency range and are ideally suited for both speech and music reproduction.

Active Column Speakers with Integrated DSP

ZL 200 A-DSC AIArray	Active 6-channel line array with DSP, the vertical directivity is adjustable via our LB AUDIO CONTROL Software, 24 × 2.5" long excursion full-range drivers Power 6 × 100 watts, input: XLR sym., interface: Ethernet Dimensions (W × H × D) 80 × 1920 × 110 mm, brackets not included	ZL 200 A-DSC AIArray White	1009-0001
		ZL 200 A-DSC AIArray Black	1009-0002
ZL 250 A-DSC AIArray	Active 8-channel line array DSP, the vertical directivity is adjustable via our LB AUDIO CONTROL Software, 32 × 2.5" long excursion full-range drivers Power 8 × 100 watts, input: XLR sym., interface: Ethernet Dimensions (W × H × D) 80 × 2500 × 110 mm, brackets not included	ZL 250 A-DSC AIArray White	1010-0001
		ZL 250 A-DSC AIArray Black	1010-0002

The vertical dispersion characteristics of the line arrays can be set using our new **LB AUDIO CONTROL Software**.

ib PA SPEAKERS

Universal **PA speakers** for the professional user. All models offer precise acoustic dispersion with a constant beam width and are optimized for a high sound pressure level with a balanced sound. The speaker systems offer precise tonal balance so that they can be perfectly combined in complex PA systems for constant sound transmission in larger listening areas.

The line array module F 208 with its patented AIArray® technology is equipped with a high-frequency array with a switchable dispersion angle of 120° x 10° or 120° x 30°. This allows the throw to be adjusted to the respective acoustic situation. Speakers can be operated individually or as a line array with two to four elements.

F 208 AIArray

The line array module with patented AIArray technology features a dispersion pattern that can be switched from 120° x 10° to 120° x 30°

AMPLIFIERS AND CONTROLLER AND ACCESSORIES

To control our speakers, we offer a comprehensive series of amplifiers and controllers that harmonize perfectly with our speakers and enable optimally tailored PA systems with maximum operational reliability. We develop and produce **compact amplifiers** as well as **multichannel 19" power amplifiers** with two to eight channels and output power of 50 to 800 watts per channel. All amplifier models are available with or without DSP.

The 19" power amplifiers can be fitted with one or two input modules for analog input signals and/or **DANTE audio networks**. Our browser-based **LB AUDIO CONTROL Software** is used to program and control amplifiers and controllers via Ethernet.

Our range is supplemented by a variety of accessories that can be used to meet specific requirements and implement particular operating concepts.

Compact Amplifiers

Our new **compact amplifiers from the PA-SERIES** are intelligent 2-channel power amplifiers in ¼ 19 inch format with output powers of 30 to 200 watts per channel, Auto on/off function and standby contact. The models PA-S 250 to PA-S 2200 are also equipped with symmetrical inputs and VCA inputs. They can be controlled using the WP-V and RP-V volume control panels or via the DV module and UP/DOWN contacts.

19" Multi-Channel Amplifiers

Remote control **19" multichannel power amplifiers** with two to eight channels and output power of 100 to 800 watts per channel. These highly efficient power amplifiers deliver an outstanding sound with low heat build-up. The switchable automatic on/off functionality for each channel switches to an energy-saving Sleep mode when not receiving an input signal. The amplifiers can be equipped with a second input module such as the **DANTE interface** to process mixed signal types. They are equipped with VCA inputs for external volume control as well as contacts for remote activation and fault signalling.

19" Multi-Channel Amplifiers with DSP

Amplifier series with integrated **8x8 DSP**. All models have eight symmetrical inputs and a total of eight outputs. Depending on the model, two to eight outputs are configured as power amplifier channels with 100 watts of output power. The remaining outputs are available as symmetrical line outputs. The amplifiers can be programmed via Ethernet using our browser-based **LB AUDIO CONTROL Software**. They can be equipped with a second input module such as the Dante interface to process mixed signal types and are equipped with VCA inputs for external volume control as well as contacts for remote On/Off and Fault.

SMART BACK SIDES

The power amplifiers feature two rear slots for two input modules, each with two to eight channels. They can be equipped with symmetrical line inputs, cinch inputs or a Dante interface (also in combination). This allows different signal types and signal combinations to be processed. DIP switches can be used to switch the automatic on/off functionality, input

sensitivity, and parallel and bridge mode separately for all channels. VCA inputs per channel enable external volume control. The amplifiers can be switched on or off via a contact.

Slots for two Input Modules

Input Modules

Input modules with two to eight channels for our 19" power amplifiers in the new PA series. The modules are available with symmetrical line inputs or asymmetrical cinch inputs. All modules are equipped with DIP switches for ground lift on each channel pair and can be configured for use with grounded or non-grounded signal sources.

	Input Modulee		Model	Order no.
	2xIN-SYM Input-Module 2 x Line In, symmetrical, pluggable screwtype terminals		2xIN-SYM	3108-0001
	4xIN-SYM Input-Module 4 x Line In, symmetrical, pluggable screwtype terminals		4xIN-SYM	3108-0002
	6xIN-SYM Input-Module 6 x Line In, symmetrical, pluggable screwtype terminals		6xIN-SYM	3108-0003
	8xIN-SYM Input-Module 8 x Line In, symmetrical, pluggable screwtype terminals		8xIN-SYM	3108-0004
	2xIN-CINCH Input-Module 2 x Line In, asymmetrical, Cinch connectors		2xIN-CINCH	3108-0005
	4xIN-CINCH Input-Module 4 x Line In, asymmetrical, Cinch connectors		4xIN-CINCH	3108-0006
	6xIN-CINCH Input-Module 6 x Line In, asymmetrical, Cinch connectors		6xIN-CINCH	3108-0007
	8xIN-CINCH Input-Module 8 x Line In, asymmetrical, Cinch connectors		8xIN-CINCH	3108-0008
Dante Input Module				
	Interface for the multi-channel transmission of uncompressed digital audio signals with low latency via 100 Mbps or 1 Gbps Ethernet networks. Signal distribution is configured using the Dante Controller routing software.			
	DANTE 8x8 Dante interface for Audio over Ethernet, 2 x RJ 45 (Primary/Secondary)		DANTE 8x8	3108-0009

Accessories for Amplifiers

Transformers for 100 V systems and external volume control for our amplifiers in the PA series.

Accessories for Amplifiers

		Model	Order no.
PA-T 2050	100 V transformer module, 2 × 50 watts, torodial core	PA-T 2050	3109-0001
PA-T 100	100 V transformer module, 100 watts, torodial core	PA-T 100	3109-0002
PA-T 200	100 V transformer module, 200 watts, torodial core	PA-T 200	3109-0003
PA-T 400	100 V transformer module, 400 watts, torodial core	PA-T 400	3109-0004
PA-T 800	100 V transformer module, 800 watts, torodial core	PA-T 800	3109-0007
PA-T 1U	Rack cradle 1 U for 4 × PA 250 SD, 4 × PA 2100 SD or 4 × PA-T 2050	PA-T 1U	3109-0005
PA-T 2U	Rack cradle 2 U for 2 × PA-T 800	PA-T 2U	3109-0008
WP-V	Wall panel, volume control for power amplifiers of PA Series Regulation and On/Mute via VCA for surface boxes	WP-V	3401-0002
RP-V	Rack panel, volume control for power amplifiers of PA Series Regulation and On/Mute via VCA for 19" rack mount RP-1U	RP-V	3402-0002
WP-0 RP-0	Wall panel, blank panel Rack panel, blank panel	WP-0 RP-0	3401-0001 3402-0001
RP-1U	Rack mount 1 U for 6 × RP panel	RP-1U	3402-0016
DV-Modul	Digitale volume control, regulation with dual push buttons (Up/Down contacts) via VCA inputs	DV-Modul	3109-0006

System controllers for processing signals in multichannel PA systems. Our browser-based **LB AUDIO CONTROL Software** offers ten fully parametric filters, a delay of up to two seconds, plus limiters and compressors for every input and output. The mixer matrix can be used to route the inputs to the various outputs as required. The controllers can be programmed via Ethernet and controlled using media control systems. We can also configure project-specific presets on request.

19" System Controllers

DSC 808	Digital system controller, 24 Bit, 48 kHz, 8 × Line IN sym., 8 × Line OUT sym. Interfaces: USB, Ethernet, 19", 1 U, LB AUDIO CONTROL Software	DSC 808	3301-0003

Customized Speakers

30 years experience in loudspeaker design and the development of countless customized models for special projects permit us to supply even small series for particular applications both within short time and at reasonable cost.

- Special dispersion-characteristics and designs
- Individual versions of cabinets and dimensions
- Special colors and particular surfaces
- 100 V versions of all kinds of loudspeakers
- Active or wireless versions of many loudspeakers
- EN 54-24 certified speakers

Directional speaker for installation in room corners

Translucent speakers in chandeliers

Miniature dodecahedron speaker for room acoustic measurements

Invisible built-in speaker system for digital signage

C 805 Flat cinema speaker

In-ceiling speaker with Polar® technology and closed back

SUB 40 active subwoofer with Dante interface

Front speaker F 10 with integrated monitor speaker F 6

Micro line array (30 mm width)

Flat on-wall subwoofer (backside)

Ring radiator for acoustic measurements

F 6 customized version

Multi-purpose hall, Muolen TG / Front and ceiling sound system

Technisches Museum, Vienna / Large-area sound system with cylindric speakers FZ 180 Polar

Seecafe Bar Spitzvilla, Traunkirchen, A / Sound system with S2 Cluster and Sub 20

Private mansion, CH / Sound system with in-ceiling speakers DE Series

Bayerischer Landtag Munich / Multi-channel sound system with invisible Line Arrays

Deisl Sauna, Liezen, A / Showroom with invisible speakers DE Plan Series

Rietwies Wattwil Gym, CH / In-ceiling speakers DE 300.CDR

Reformierte Kirche Bühler AR / Sound system with column speakers

Private mansion, CH / Invisible Speakers DE Plan inside in furniture

DEVELOPMENT AND PRODUCTION

We work closely with customers, planners and architects to develop our sophisticated speakers and amplifiers.

Special designs, tailored sound dispersion characteristics and patented details are just some of the unique features that make our sound systems the perfect building blocks for multimedia installations and speech amplification systems.

All LB products are developed and manufactured in accordance with **ISO 9001:2015**.

We work with regional suppliers and use the highest quality components. Designed with sustainability in mind, every part is long lasting and energy efficient.

Our products are easy to maintain and service thanks to their modular design. We offer a **five-year warranty** on our products.

DLX-A 2.8 DSC AIArray with multi-channel tweeter waveguide
